Protective Coatings for Concrete Pipe Trenches - Bldg. 301, Elmer

April 2, 1953

References: Teletype 0666 dated March 21, 1953 Change Order 3758

Drawings FS-2005-6, F.S. 2006-3 and F.S. 2007-6

Your request in the referenced teletype for a protective coating to seal the surface of a concrete trench from the action of double concentration sea water solution (brine) has been discussed with the following manufacturers of coatings believed to the suitable: "如何的证明。" 第二

Americat Corporation Super Concrete Emulsion Company Atlas Mineral Products Company

We also requested information on products for coating the steel pipe shown in some of the trenches by your drawings, and an acid-resistant paint for the wooden platform in the sold tank area.

The American offering, covering their coal tar base product, is attached.

Recommendations of the Super Concrete Emulsion Company, covering an asphalt emulsion product, are expected shortly, and will be forwarded when received.

Verbal recommendations from the Atlas Mineral Products Company are for their carbon-filled neoprene base NEELIUM maintenance material. (Sample Attached). This will be suitable for concrete, steel or wood. No primer is required, and on concrete will give a one-coat coverage of 40 square feet per gallon. Three coats are recommended. The cost is \$7.00 per gallon in 5-gallon pails, F.O.B. Mertztown, Pennsylvania. For a minimum cost coating they offer their ATLASTIC #31 asphaltic base membrane coating. A 1/4" thick coating is recommended, applied in at least three hot applications, which requires approximately 14 pounds per square foot.
